Bikini Bottom Genetics

Name _____

Scientists at Bikini Bottoms have been investigating the genetic makeup of the organisms in this community. Use the information provided and your knowledge of genetics to answer each question.

1. For each genotype below, indicate whether it is a heterozygous (He) OR homozygous (Ho).

T D	T Dd	Bb ff	DD Tt	Ff bb	tt BB	dd FF	
Which of	the genotype	s in #1 would	be considered p	ourebred?			
Which of	the genotype	s in #1 would	be hybrids?				
2. Deter	mine the phe	notype for eacl	h genotype usir	ng the informat	ion provided ab	out SpongeE	Bob.
		color is domina			уу		_
S S	quare shape : S	is dominant to	round. Ss		SS		
3. For ea	ach phenotyp	e, give the gen	otypes that are	possible for Pa	utrick.		
	•) is dominant t	. ,	Short =			
			ant to yellow (=		_
for his so	juare shape, l	out SpongeSus		eate a Punnett s	s at a dance. Sp quare to show t question #2!		
A. List t	he possible g	genotypes and I	phenotypes for	their children.			
B. What	are the chan	ces of a child v	with a square sł	nape?ou	t ofor	_%	
C. What	are the chan	ces of a child v	with a round sh	ape?out	ofor	_%	
5. Patricl	k met Patti at	the dance. Bot	th of them are h	neterozygous fo	or their pink bo	dy color, whi	ich is dominant

over a yellow body color. Create a Punnett square to show the possibilities that would result if Patrick and Patti had children. HINT: Read question #3!

A. List the possible genotypes and phenotypes for their children.	
B. What are the chances of a child with a pink body?out of%	
C. What are the chances of a child with a yellow body?out of%	

6. Everyone in Squidward's family has light blue skin, which is the dominant trait for body color in his hometown of Squid Valley. His family brags that they are a "purebred" line. He recently married a nice girl who has light green skin, which is a recessive trait. Create a Punnett square to show the possibilities that would result if Squidward and his new bride had children. Use B to represent the dominant gene and b to represent the recessive gene.

A. List the possible genotypes and phenotypes for their children.

B. What are the chances of a child with light blue skin?____%

C. What are the chances of a child with light green skin?____%

D. Would Squidward's children still be considered purebreds? Explain!

7. Assume that one of Squidward's sons, who is heterozygous for the light blue body color, married a girl that was also heterozygous. Create a Punnett square to show the possibilities that would result if they had children.

A. List the possible genotypes and phenotypes for their children.

B. What are the chances of a child with light blue skin?____%

C. What are the chances of a child with light green skin?____%

8. Mr. Krabbs and his wife recently had a Lil' Krabby, but it has not been a happy occasion for them. Mrs. Krabbs has been upset since she first saw her new baby who had short eyeballs. She claims that the hospital goofed and mixed up her baby with someone else's baby. Mr. Krabbs is homozygous for his tall eyeballs, while his wife is heterozygous for her tall eyeballs. Some members of her family have short eyes, which is the recessive trait. Create a Punnett square using T for the dominant gene and t for the recessive one.

A. List the possible genotypes and phenotypes for their children.

B. Did the hospital make a mistake? Explain your answer
